FLEXdose
DELIVERY PROGRAMME

Patient Scenario

Adapt the treatment to the schedule, not the schedule to the treatment

Time to Treat
4 days

Day 1
- Review patient case
- Dose order

Day 2
- Mapping performed

Day 3
- Dose delivered
- Patient treated

Day 4
- Dose delivered
- Patient treated

• A 63-year-old patient with liver-dominant mCRC

• Two metastases in the right lobe

• Tumour board decision for SIRT

• Multiple delivery options
• Earlier delivery
• Extended order deadlines
• Increased flexibility for treatment

The activity **YOU WANT.** The coverage **YOU NEED.**

Maximise **coverage**
- More spheres

Maximise **penetration**
- Less spheres

**Example:**
- 1.2 GBq drawn from a dose at day of calibration
- Example: 1.2 GBq drawn from a dose 3 days pre-calibration

**Maximise Coverage**

<table>
<thead>
<tr>
<th>1 day Pre-calibration</th>
<th>2 days Pre-calibration</th>
<th>3 days Pre-calibration</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.3 GBq</td>
<td>5.6 GBq</td>
<td>7.2 GBq</td>
</tr>
</tbody>
</table>

**Optimise Activity**

- Hypervascular
- Large treatment area
- Impaired vasculature
- Superselective catheter position
- Small tumours
- Segmentectomy

**FLEXdose DELIVERY PROGRAMME**

The unique flexibility of SIR-Spheres Y-90 resin microspheres

**Flexible treatment strategy**
- Tailored activity for patient-specific needs
- Multiple injection sites
- Procedural approach can be adjusted on day of treatment
- Full control through angiographic visibility

**Flexible treatment planning**
- Multiple delivery options for an expedited patient path
- For time-sensitive situations order and treat the same week

**Flexible dose draw**
- Activity ready to use when required
- Possibility to adapt the activity until the very last minute
